Ubuntu 14.04: What's new?
Elizabeth K. Joseph

Automation & Tools Engineer at HP working on the OpenStack project infrastructure

Member of the Ubuntu Community Council

Co-author of the 8th edition of the Official Ubuntu Book
What I'll Cover

- Unity Desktop
- Server
- Phablet
- Xubuntu
Unity

- Still on Unity 7 on the desktop
- Still using XOrg, not Mir
Ability to change location of application menubar
Per monitor scaling

Improved support for scaling of monitors of different sizes
New screen lock

Login screen is shown when screen is locked
Theme tweaks

Makes things a bit prettier :)
Updates to keybindings

• A keybinding dialog pops up when you log in, check out the new ones!

• Pull it up again by holding down the super key (the one with the operating system logo on it)
Support period

Supported for 5 years on Desktop and Server
(just like 12.04)
Retirement of Ubuntu One

The Ubuntu One service has been shut down and is not included in this release
Improvements to the dash

• Search multiple Internet sources at once (you can still disable this entirely too)
• Filtering by category or source
• Improvements to photo lens
• Add or remove scopes (CLI-based)
• New friends scope to browse social media
Other new features

- Linux kernel 3.13
- Improvements to AppArmor
- LibreOffice 4.2.3
- Default Python 2.7, includes Python 3.4

See https://wiki.ubuntu.com/TrustyTahr/ReleaseNotes for more
Server

- OpenStack Icehouse
- Libvirt 1.2
- LXC 1.0
- Docker
- Xen 4.4
- Qemu 2.0
- Open vSwitch 2.0.1
Server

- Puppet 3
- StrongSwan (IPSec) in main
- Apache 2.4 (read the release notes!)
- PHP 5.5
Server

And lots more cloud stuff!

- Juju orchestration
- MAAS
- Cloud images
Phablet

Supported Devices:
- Nexus 4 Phone (mako)
- Nexus 7 (2013) Tablet (flo)
- Nexus 10 Tablet (manta)

Dropped support:
- Galaxy Nexus Phone (maguro)
- Nexus 7 (2012) Tablet (grouper)
Phablet

Demo!

Try it out yourself:
https://wiki.ubuntu.com/Touch/Install
Xubuntu

Whiskermenu as the default menu along with a new single-panel layout
Xubuntu

Light Locker replaces xscreensaver for screen locking
Xubuntu

Community wallpapers package

...and themes updated to work with the latest GTK3 version
Xubuntu

Mugshot for editing personal preferences
